

## Round Window Brush - White Tampico

Our round window brush has great liquid retention and is resistant to solvents. The plastic block head has two threaded sockets and is compatible with tapered handles.

This round window brush is constructed of a molded plastic block with natural white tampico bristles that absorb and release solution to effectively clean a variety of surfaces. The tampico bristles soften when wet for an effective clean without scratching. The brush features two threaded sockets for different [threaded handle](#) positions.

Product Features

- Rugged plastic block
- White tampico bristles
- Two threaded sockets allow for different handle positions
- Ideal for commercial and institutional applications
