

Plastic Pail Lid Opener

Experience effortless lid removal with our plastic pail lid opener. Ideal for removing foodservice container lids

Crafted from high-quality plastic material, this bucket lid opener is sturdy, durable, and resistant to rust and wear, guaranteeing long-lasting performance. The opener mouth features a hook shape, allowing for easy prying without any hassle. Its wide application makes it a versatile tool for opening various lids, including paint buckets, chemical barrels and large foodservice containers. This plastic pail lid opener is easy-to-use. Simply position the grip tool on the edge of the lid and gently lift upwards, repeating the process around all edges for a smooth removal. Its handle design provides maximum leverage, ensuring a labor-saving experience. The anti-slip grip with finger grooves ensures safe handling, making it perfect for tackling hard-to-open lids.

Add this tool alongside foodservice items like the [1500 g Medium Hand Scoop](#) and the [46" Food Processing Paddle](#).
