

Track / Switch Industrial Broom with Forged Chisel

Perfect for rail and road maintenance and construction.

For rail applications: Effortlessly sweep away gravel and rocks from ties, or use the heavy-duty chisel to break through stubborn ice buildup in expansion joints, rail switches, and other critical equipment that must remain clean and operational.

Key Features:

- Durable coarse polypropylene fibers reinforced with a heavy-gauge wire band to tackle even the toughest debris on uneven surfaces.
- Sturdy solid hardwood handle with a fully enclosed metal cap and riveted construction for exceptional durability in demanding industrial environments.
