

Bi-Level Vehicle Brush

This high-quality bi-level brush can be used to clean vehicles, equipment, windows, and siding without damaging the finish.

This bi-level vehicle brush is made with durable plastic and green flagged bristles that are soft and will not damage the finish of your car or truck. It features 5 flow through holes that allow water to be dispersed across the entire areas of the brush. The brush is compatible with standard threaded handles or extension poles. A must-have tool for regular car maintenance.

This brush is also available in an [acid resistant model](#).
