

Bi-Level Vehicle Brush - Acid Resistant

This acid-resistant vehicle brush can be used with any car washing products. Use it for routine maintenance of cars, trucks and buses.

This versatile bi-level vehicle brush is made with durable plastic and soft flagged bristles that are acid-resistant and will not damage the finish of cars or trucks. It features a flow through design that allows water to be dispersed across the brush. This tool is compatible with standard threaded handles or extension poles. Ideal for residential and commercial applications.

This brush is also available in an [model with plastic green flagged bristles](#).
