

Brix Compact Pre-Soak System

The versatile Brix Compact Pre-Soak System is ideal for commercial and institutional building maintenance.

The Brix Compact Pre-Soak System features sturdy and noise-free rubber wheels, a practical compartment, two drawers, two buckets with lid, doors with locks and more. This modular trolley offers improved performances and is designed for applications in any environment. The sides have bumpers for durability and the modules are made of strong recycled plastic. You can also purchase this [Brix Compact System](#) without the buckets or as part of the [Brix Compact Office System](#) with two buckets and down press wringer.
