

60" Non-Threaded Fiberglass Handle - White

This versatile and durable non-threaded fiberglass handle is compatible with a variety of push brooms, dust mops, and squeegees and is ideal for use in the food processing industry.

This non-threaded fiberglass handle offers many advantages over metal or wood handles, particularly in environments where hygiene is a priority. Made from a continuous one-piece structure, it will not splinter, bend, or delaminate. The fiberglass handle is lightweight yet remarkably strong and does not warp or rot. It is also water-resistant and therefore electrically non-conductive. Use this handle with any locking collar item, like the [Stainless Steel Squeegee Handle](#).

Product Features

- Made of fiberglass and thermoset resin matrix and plastic
- Cap with hanging hole
- Non-threaded
- Water and bacteria resistant
- Can be used in a colour coded system
- Ideal for commercial and industrial use
