

Push Broom Braces

These broom braces provide excellent reinforcement to larger broom handles. They allow for better control and extra support for wide sweeps.

The Push Broom Braces are designed to reduce handle breakage. The metal construction ensures a durable connection with the broom head for heavy-duty usage. The braces provide additional strength on larger brooms by keeping the handle in place securely. They are perfect for rough commercial and industrial applications. Try these braces on a [Palmyra Coarse Sweep Push Broom](#) or on a [Garage Medium/Stiff Push Broom](#).

Product Features

- Sturdy metal construction

- The clamp securely fits around any size push broom for extra handle support
- Prevents the broom handle from getting disconnected from the broom head
- Quick and easy to install
